

STRATEGIC PLAN

2026-2030

The IEEE Computer Society Strategic Plan 2026-2030 outlines crosscutting and overarching areas of focus for our growth and success in the next five years. These goals serve as priorities for all of our programs, products, and services, and advance the Society's vision "to be the leading provider of technical information, community services, and personalized services to the world's computing professionals" goals.
