

IEEE INTELLIGENT SYSTEMS

AI's 10 to Watch

CALL FOR NOMINATIONS

▶ ABOUT THE AWARD

IEEE Intelligent Systems, IEEE's first AI publication, has promoted emerging AI leaders through its prestigious "AI's 10 to Watch" award since 2006. In each biennial competition, aspiring AI stars from all over the world are put through the highly competitive selection process until the top 10 are chosen. Many of these awardees have become renowned AI leaders.

Please help us share this exciting opportunity as widely as possible and encourage nominations so that aspiring next-generation AI scientists and engineers worldwide can be considered for this prestigious award.

▶ ELIGIBILITY

- Nominees will have received their PhD in 2012 or later (i.e., they are within 10 years of PhD graduation) and have not received this award before.
- Nominees will have already demonstrated globally recognized and significant scientific or engineering contributions to one or more areas of AI.
- Nominators must complete the 2022 "AI's 10 to Watch" nomination form.
 - » The process requires a nominator, who will assemble and submit materials for the nomination into CMT.
 - » A nominator is any person having worked more than 10 years after obtaining a PhD in AI or in an AI-related area.
- Nominators will include three support letters, including one from an employer/institution and two from renowned AI experts in the area.

▶ NOMINATION & AWARD INFORMATION

Complete nomination, deadline, and award information can be found here: www.computer.org/ai10

Honorees will be featured in a special section of *IEEE Intelligent Systems*, and will be recognized with a special certificate.
